DETAILED ACTION

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Claim 7, an outer cover layer having a modulus in a range of about 1,000 to about 30,000 psi is not in the specification.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 2 and 4-8 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The Shore D hardness for the outer cover layer is 20 to 40 according to the specification (page 15, line 1).

Allowable Subject Matter

Claims 1 and 3 are allowed.

Terminal Disclaimer

The terminal disclaimer filed on 9-25-01 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 6,210,293 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Response to Arguments

Applicant's arguments filed 10-4-01 have been fully considered but they are not persuasive. The objection to the specification has been maintained. In order to overcome the objection applicant is required to include the subject in the specification.
